INFSCI 2620
Developing Secure Systems
HW1
Due Feb 8
Points: 100

Based on the Related Reading Materials for Lecture 1-3, write an article of at most 5 pages (11 point, single spacing) focused on the Secure Software development Life Cycle models and methodologies/approaches. Your article could be in the form of the review, critique and summary of the topic; or about a new approach based on the best of the ideas you have read and new developments.

You are recommended/encouraged to visit the following sites to search for newer materials on the topic:

- IEEExplore digital library
- ACM digital library
- NIST documents
- https://buildsecurityin.us-cert.gov/

Make appropriate citation to reference materials.
